webneth99@gmail.com · github.com/Arch-host · linkedin.com/in/victor-benneth-966b7712a

TS Academy certified full-stack developer and final-year B.Sc. Computer Science student, with years of people-facing experience that sharpened my communication and client skills. I build and deploy web applications and REST APIs, work comfortably in team Git workflows, and have trained in AI-driven development for lead generation and outreach. Seeking a junior developer or tech-sales role where technical skill and strong communication both matter.

PROFESSIONAL EXPERIENCE

CourseCareers ***Remote***
AI Career Essentials (ALX AiCE) *March 2026–Present*

- Learned the fundamentals of AI-driven development.
- Gained hands-on experience using AI to enhance lead generation and outreach personalization.

TS Academy ***Remote***
Software Development Trainee *Nov 2025–Oct 2026*

- Completed an intensive full-stack program covering HTML, CSS, JavaScript, backend APIs, and databases.
- Built and deployed responsive web applications that integrate backend APIs and databases.
- Collaborated on team projects using version control, debugging, and agile development practices.
- **Adesua – E-Learning Course Marketplace** (final capstone project, team of 3):
  - Built and deployed a full-stack platform where instructors publish video courses, students enroll and track progress, and admins manage users and categories.
  - Developed the order and enrollment data models with automated tests, and built the front-end authentication layer: login and registration, protected and role-based routes, and API integration.
  - Worked in a professional Git workflow using feature branches, pull requests, and code review.
- **BokuSuperMarket – Inventory Management System:**
  - Built a Node.js and Express REST API for managing products, with user authentication, role-based permissions, image uploads through Cloudinary, and email notifications.
  - Deployed the application to Render and resolved production issues including dependency conflicts, case-sensitive file paths, and environment configuration.

Harvoxx Tech ***Port Harcourt, Rivers***
IT Intern *March 2024–August 2024*

- Applied IT knowledge to assist with digital systems and technical troubleshooting.
- Built, deployed, and managed multiple responsive websites.

ACCOMPLISHMENTS

- Certified Software Developer — TS Academy.
- Completed three front-end development projects during IT training at Harvoxx Tech.

EDUCATION

Ritman University ***Uyo***
B.Sc. Computer Science*September* *2022–Nov 2026*

SKILLS

- **Technical:** JavaScript, HTML5, CSS3, Python, React, Node.js, Express, REST APIs, JWT authentication, role-based access control, MongoDB, Postman, Git and GitHub, Cloudinary, Render
- **Practices:** Debugging, automated testing, agile teamwork, pull requests and code review
- **Communication:** Strong written and verbal communication, built through years of customer- and people-facing work
- **Languages:** English (fluent), Japanese (beginner)
- **Software:** Microsoft Word, PowerPoint, Excel
